

MSM complex⁷

MSM (methylsulfonylmethane)

MSM Complex⁷ - The heavy hitter against what pains you. Unique Formulation.

MSM Complex⁷, unique formulation, packed with all natural effective herbs, is an analgesic which dilates or relaxes the capillaries making the skin more receptive to the ingredients in the formula and increases the blood flow to help soothe and relieve areas of discomfort.

Helpful in preventing the degeneration of cartilage, ligaments, tendons and other collagen diseases. Soothing at first, then a warm tingling, then the original discomfort seems to disappear!

Great success in eliminating, for many, the discomforts from an active lifestyle, aging and everyday strains.

Dr. Stanley Jacob, at the University of Oregon Medical School, first isolated MSM in the

early 80's. This research revealed that the natural sulfur compound MSM, or methyl sulfonyl methane, occurs in every cell of the body and all the body's metabolic processes involve sulfur. Next to oxygen, water, and salt, sulfur is the fourth most common compound in the body and its presence is essential for cell regeneration and nourishment. Almost half of the sulfur in the body exists in the muscles, skin and bones - a primary component of cartilage and connective tissue. MSM is a nutrient form of sulfur found in many common foods such as fruits, vegetables, meat, fish, milk and eggs.

MSM Complex⁷ is a topical treatment that is great news for people who suffer from muscle and joint problems. Not only does it contain MSM but also other ingredients that may help condition and heal the skin while penetrating down assisting relief.

**Don't sacrifice your health.
Get the best! AMS MSM
Complex⁷**

**The natural solution
for aching muscles
and joints.**

**Active
